

INFORMATION FOR AUTHORS

As a general mathematics journal, *Acta et Commentationes Universitatis Tartuensis de Mathematica* publishes original research papers in pure and applied mathematics. Submission of a paper acknowledges that the paper has not been published nor submitted for publication elsewhere. Manuscripts must be in their final form. They should be sent to the Editorial Coordinator.

Structure of a manuscript:

- Title of the paper
- Name(s) of the author(s)
- Abstract (not exceeding 13 lines) which can be read independently of the paper (references in the abstract should be avoided)
- Text of the paper
- References (should be listed in alphabetical order; abbreviations of journal names should follow *Mathematical Reviews*)
- Complete address of each author (also the e-mail address if possible)

Manuscript should contain also the 2010 *Mathematics Subject Classification* and keywords.

The publisher requires submission of manuscripts written in L^AT_EX (AMS document class). After a paper has been accepted for publication, the author will be asked to send the final T_EX-file by e-mail or on a disk to the Editorial Coordinator. Authors are suggested to begin the T_EX-file of manuscripts with the following commands:

```
\documentclass[11pt,reqno]{amsart}
\setlength{\textwidth}{5in}
\setlength{\textheight}{7.7in}
```

There are no page charges and the author(s) will be provided with a reprint of the published article in printable PDF form via e-mail, free of charge.

Acta et Commentationes Universitatis Tartuensis de Mathematica is an open access journal starting with volume 14 (2010). This means that all content is freely available without charge on the website of the journal (<http://www.math.ut.ee/acta/>).
